

Growing our brains!

From base line learning gaps identified: SCSA, LA, MFB, and WRITING are the weakest areas.

So came up with the idea of a magic box to help engagement as different things will keep appearing to keep their attention.

Linking in with books to stimulate writing

Launching characteristics of learning through dinosaurs to develop the skills they need to develop their learning.

Deeper thinking questions.

What do I do if I can't play with someone?

How do I try something new?

What do I do if I want to be someone else?

What can I do if I face a problem?

How can I play with others if I am on my own?
